

SalesPulse Executive Report

End-to-End Sales Analytics & Business Intelligence Project

Business Objective

Analyze sales performance across products and markets to identify revenue drivers, monitor key business KPIs, and support strategic decision-making.

Key Performance Indicators

- * **Total Revenue: 985M**
- * **Total Quantity Sold: 2M**
- * **Average Order Value (AOV): 6.64K**

Key Findings

• Market Performance

Market004 contributes approximately 53% of total revenue, making it the largest revenue-generating market.

• Product Performance

Products 318, 316, and 324 are among the highest-performing products and contribute significantly to overall revenue.

• Revenue Trends

Revenue declined from approximately 100M in January to 55M in September before recovering during Q4.

• Order Value Analysis

The Average Order Value currently stands at 6.64K, indicating opportunities for revenue growth through customer spending optimization.

Strategic Recommendations

1. Market Diversification

Reduce dependency on Market004 by increasing marketing and sales efforts in underperforming markets.

2. Product Optimization

Prioritize inventory planning and promotional activities for top-performing products.

3. Seasonal Revenue Planning

Implement targeted campaigns before historically low-performing periods to reduce revenue fluctuations.

4. Average Order Value Growth

Introduce product bundles, cross-selling strategies, and upselling opportunities to increase revenue per transaction.

Expected Business Impact

* Improved revenue stability

- * Better inventory utilization
- * Increased sales efficiency
- * Higher average order value
- * More data-driven business decisions

Conclusion

SalesPulse successfully transforms raw sales data into actionable business insights through data analysis, KPI monitoring, and interactive business intelligence reporting. The project demonstrates how analytics can support strategic decision-making and revenue optimization.
